高频铁损曲线
Core loss curves at high frequency

B30P110

测定: 25cm Epstein 方圈
试样: 纵向试样, 800°C消应力退火
密度: 7.65kg/dm³
Tested by Epstein test apparatus. Samples were sheared in the rolling direction and subjected to stress-relief annealing at 800°C. Assumed density 7.65kg/dm³
